

LOW LOSS HEADER - HORIZONTAL

Hydraulic switcher/separator

Product Number : HF1100/HF1101

The hydraulic switcher is ideal for the hydronic balance and improved performance of a hydronic heating system.

This device separates hydraulically the primary circuit from the secondary circuit giving improved balance and increasing the volumetric output. increasing the efficiency of the system.

	HW60/125 1"	HW60/125 1¼"
Product Number	HF1100	HF1101
Flow up to	2 m³/h	3 m³/h
Upper connection	1" M	1¼" M
Center distance [upper] [mm]	125	125
Lower connection to boiler	1" F	1¼" F
Center distance [lower] [mm]	250	250
Drain cork	yes	yes
Nominal pressure [bar]	10	10
Max. working temperature	110 °C	110 °C
Removable magnetic inserts	yes	yes

LOW LOSS HEADER ACCESSORIES

LLH/Distributor Connectors

Product Number : HF2001

[1"F-1"F] [x2]

Low Loss Header Brackets

Product Number : HF1105

Plug

Product Number : HF2305

Socket for optional sensor port / ½" plug included
